

ENHANCEMENT OF SECURITY SYSTEM

Dear Members,

In our ongoing efforts to prioritise your safety and protect our club premises, we are pleased to inform you that a new team of security personnel has been appointed to ensure a safe and enjoyable environment for everyone at the club. We seek your patience and cooperation by presenting your membership card during random checks by the team.

As part of our digital transformation, we are also taking steps to enhance our security surveillance system and access points over the next few months.

Along with these enhancements, the club will be introducing new membership card and face recognition entry system to streamline access into the club premise. To facilitate this upgrade, all members will be required to update their personal particulars and recent photograph. Details on how to update your information will be shared in Q1 of 2025.

Thank you for your understanding and support as we implement these improvements.
