

Idle Fees Implementation by Keppel Volt

Dear members,

Please be informed that Keppel Volt has introduced idle fees to deter hogging and reduce waiting times for EV drivers.

At our club, a **30-minute grace period** is given once your vehicle is fully charged (compared to 20 minutes at other locations). After this grace period, idling fees will apply if the charging lot is not vacated.

We encourage affected members to enable notifications on the Volt app to avoid missing important alerts, such as when charging is completed.

Please refer to the second page of this notice for instructions on how to enable notifications.

To turn on notifications on your Volt app, please go to **Profile > Notification > Ensure all 3 notification settings are kept ON.**
