

Façade Panels Replacement Works

Dear Members,

Please note that scaffolding was erected on **Mon, 19 Oct 2026**, at the section near the loading/unloading bay. This marks the start of works to remove and replace the heavy granite wall slabs on the clubhouse façade with Glass Fiber Reinforced Concrete facade panels.

Upcoming works

Scaffolding will be extended to cover the entire façade of the clubhouse from **Fri, 23 Oct 2026**. The slab replacement works are expected to be completed by end of Dec 2026.

Access to the Club

Access in and out of the Club will not be affected. For Members' safety, a covered safety walkway will be built at the Main Entrance, leading Members directly into the Club's lobby. Members are kindly asked to use the covered walkway, keep clear of the scaffolding and cordoned-off areas at all times, and supervise any children accompanying them.
