Scheduled Fogging at the Courtyard

Dear Members,

As part of the Club's regular pest control, and especially during the wet and humid monsoon season from November to March, the Club carries out routine fogging and pesticide oiling to curb mosquito breeding.

Fogging will therefore take place tomorrow, Friday, 20 November 2026, from 10.00am to 10.30am at the Courtyard as it is facing the Padang field and shaded by heritage trees along Connaught Drive.

There will be some noise and fumes emitted during the fogging session. Members are kindly asked to avoid the area during this time. This routine fogging helps keep members and guests safe, so you can keep enjoying outdoor sports and activities.

Thank you for your understanding and cooperation.
