# Exciting Upgrades Underway

**A/C**

## GM'S MESSAGE

Dear Valued Members,

In this month full of celebrations, I am thrilled to share some exciting news with you! Our dedicated teams are working diligently to bring significant upgrades that will elevate your club experience.

**Lift Upgrade:** Brace yourselves for a smoother ride! Following the approval of Resolution 7 at this year's AGM, our lift upgrade is just around the corner. While we regret any short-term inconveniences during this process, we cannot wait to unveil the improved lift experience.

**Chill with Better Air:** Cooling things down! We are excited to inform you that the much-anticipated air-conditioning chiller upgrade is in full swing, and it is not just about cool air. This upgrade aligns with BCA's Green Mark Certification, marking another step in our commitment to environmental sustainability and improving ESG practices at SRC. The project is set to conclude by August 2024.

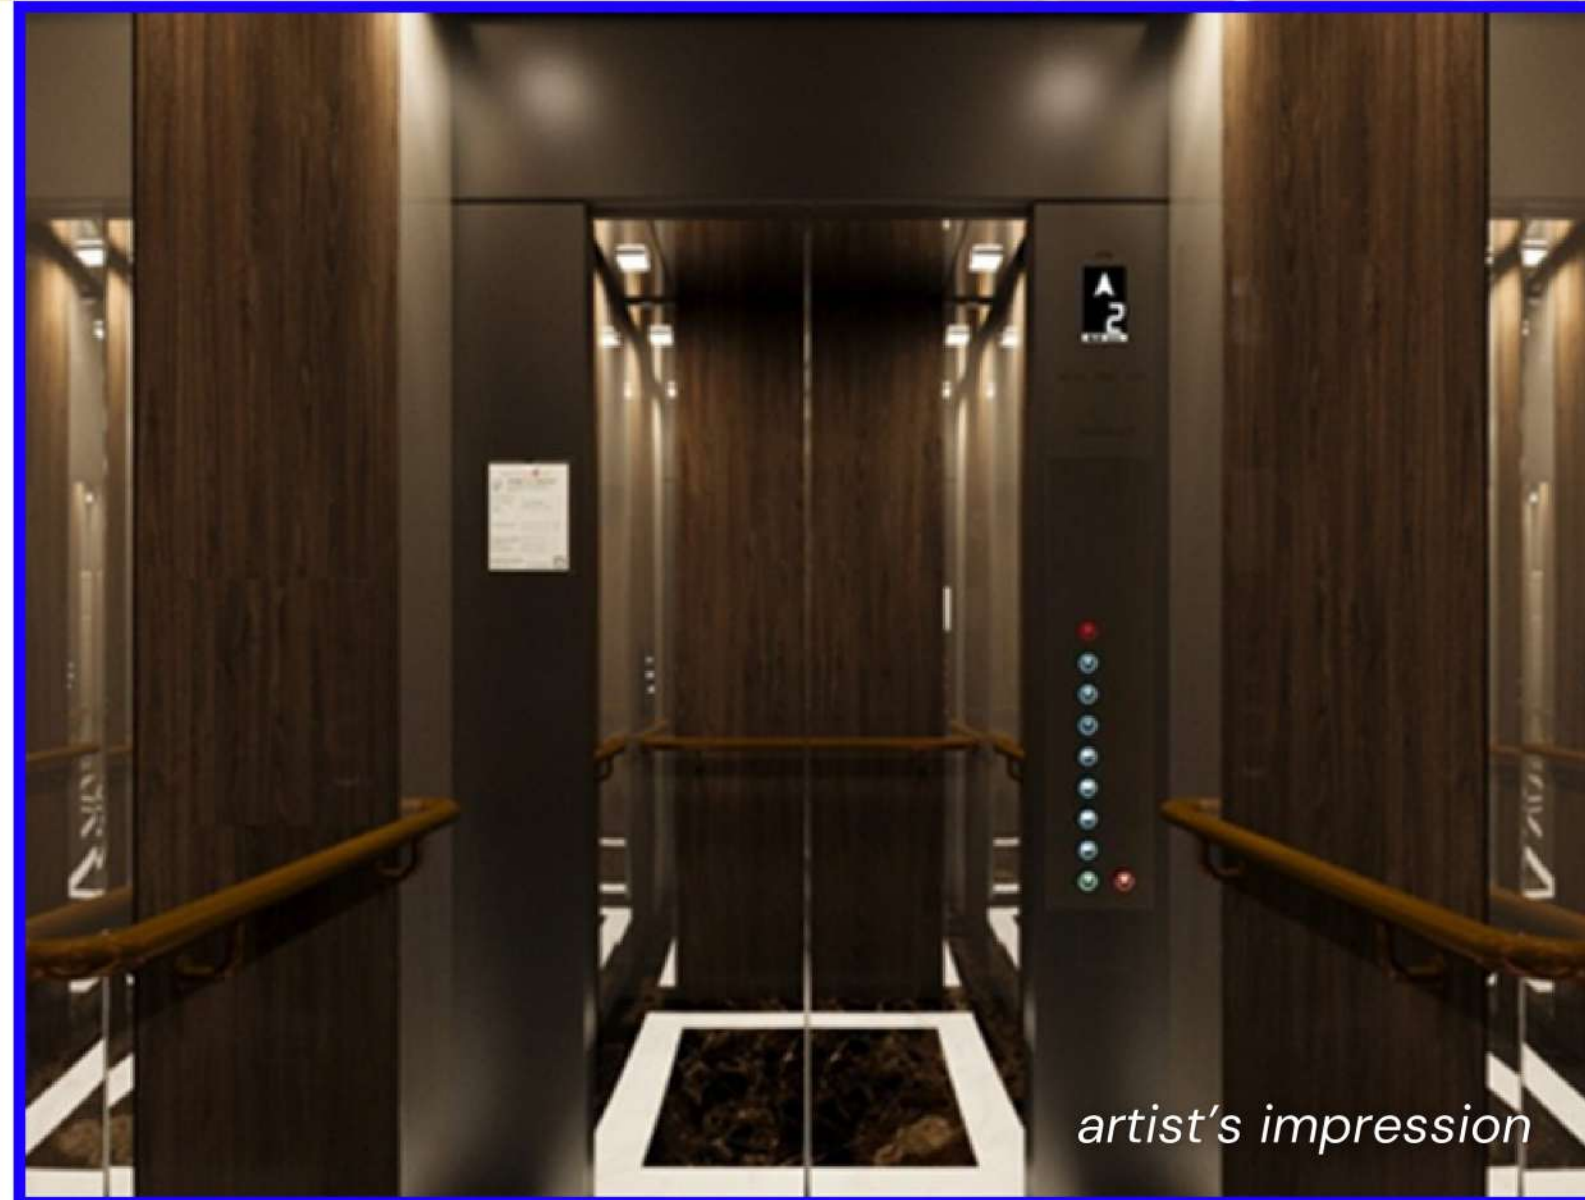

**EV Charging Convenience:** Charging into the future! As part of our commitment to sustainability, we have installed four EV Charging Lots at Basement 4. Now, you can charge your vehicles while enjoying your favourite activities at the club.

Thank you for your patience and understanding as we embark on these exciting transformations. Together, we are building a better SRC!

Wishing all members a fabulous weekend,

***Desmond Tay***  
***General Manager***

# #SRCtransforms: **LIFT UPGRADE**

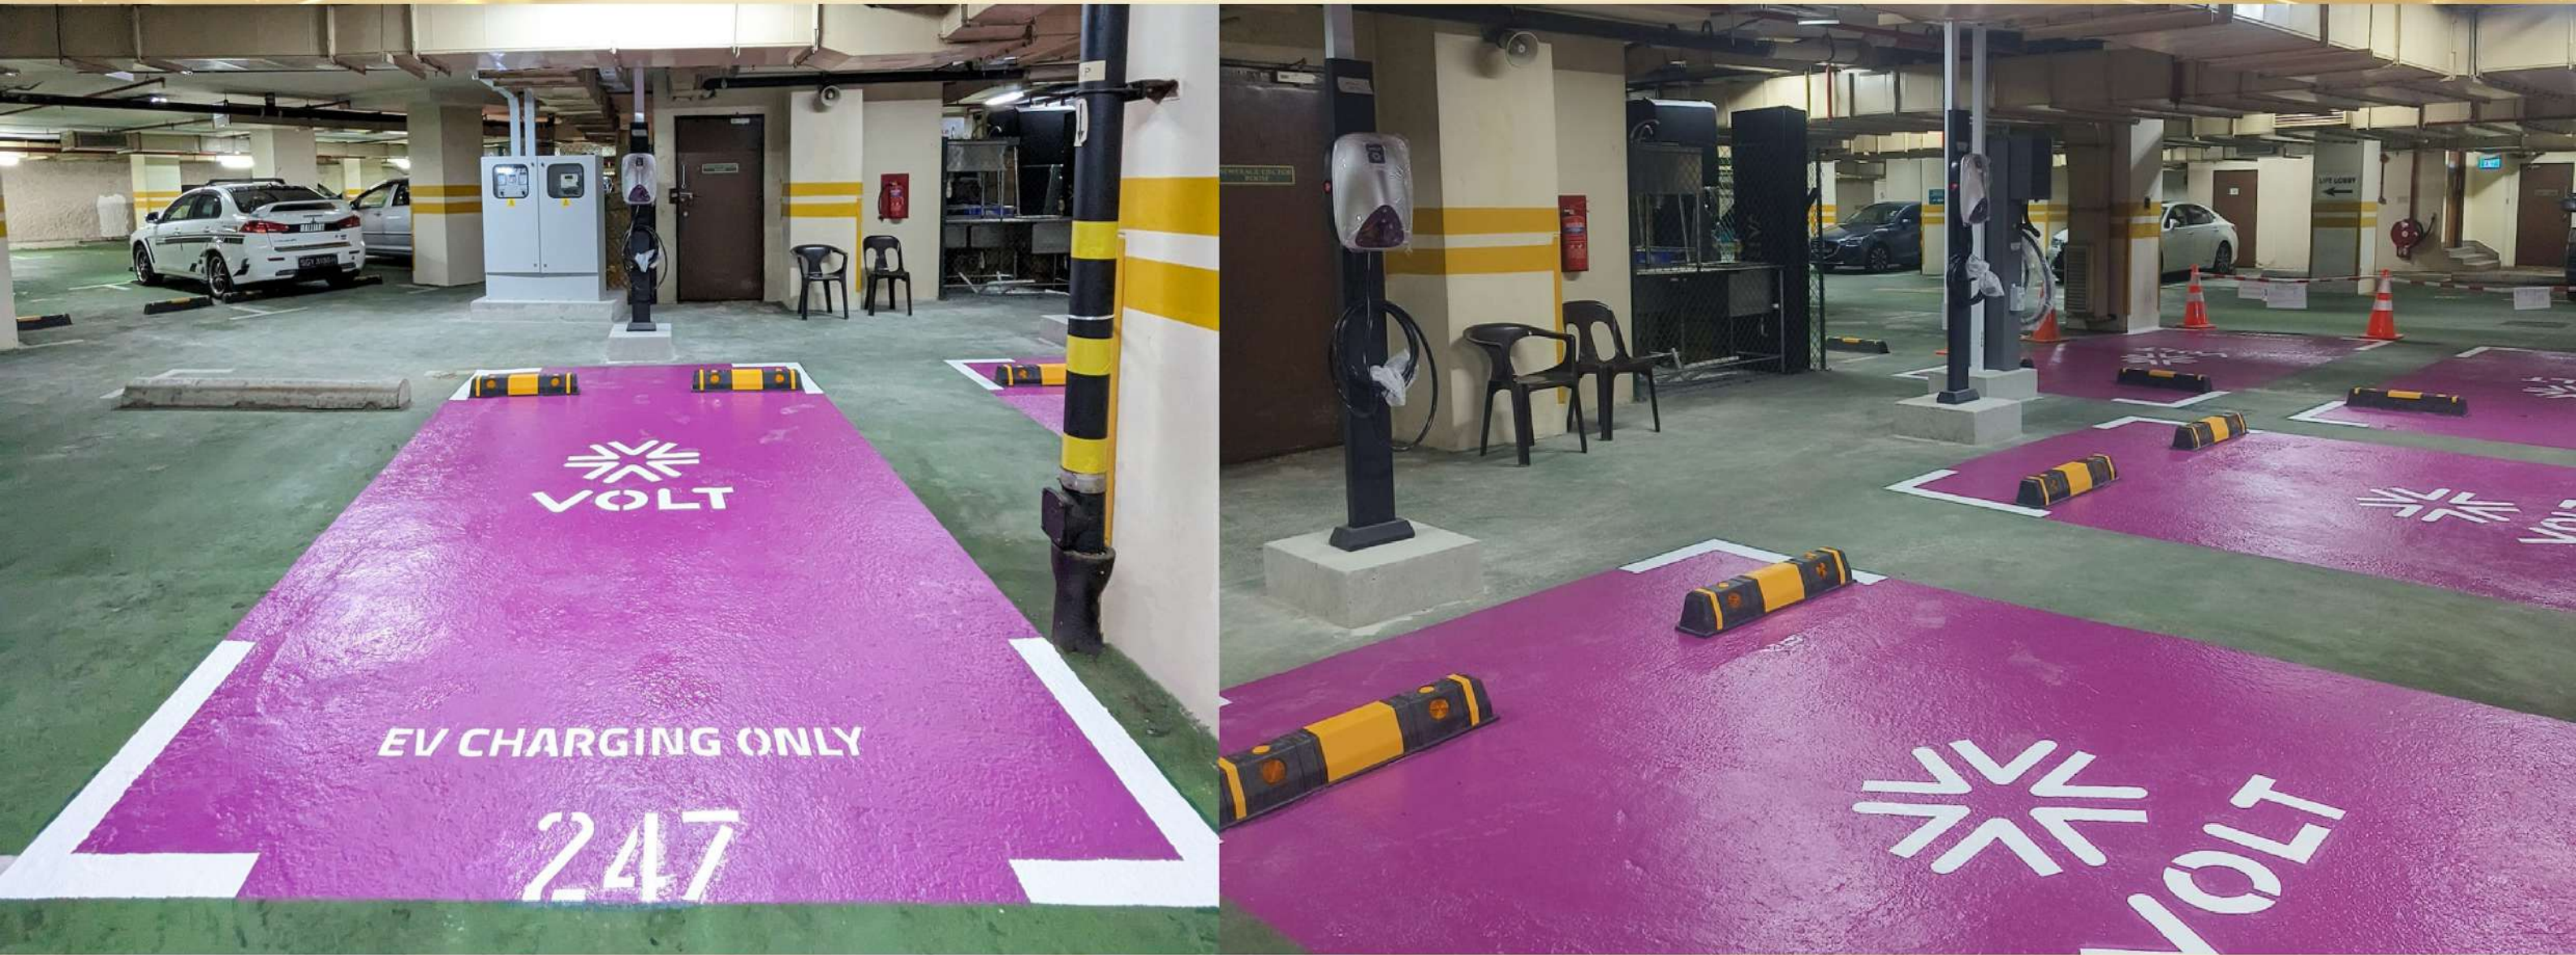

- ✓ Fresh and Modern Appearance
